

Unifor Local Website Solution

A Unified Website Solution

Northern Commerce and Unifor have teamed up to roll out a redesigned and engagement-driven website (www.unifor.org). As part of our work, Unifor National has taken the lead in developing a Drupal 9 framework for Unifor Locals.

Why Upgrade?

Drupal 9 makes content editing a breeze, offering simple, intuitive and powerful tools to administrators. It boasts a clean experience for those accessing the site on mobile devices, and new Drupal UI changes to promote accessibility and easy content creation.

An Opportunity for Your Local

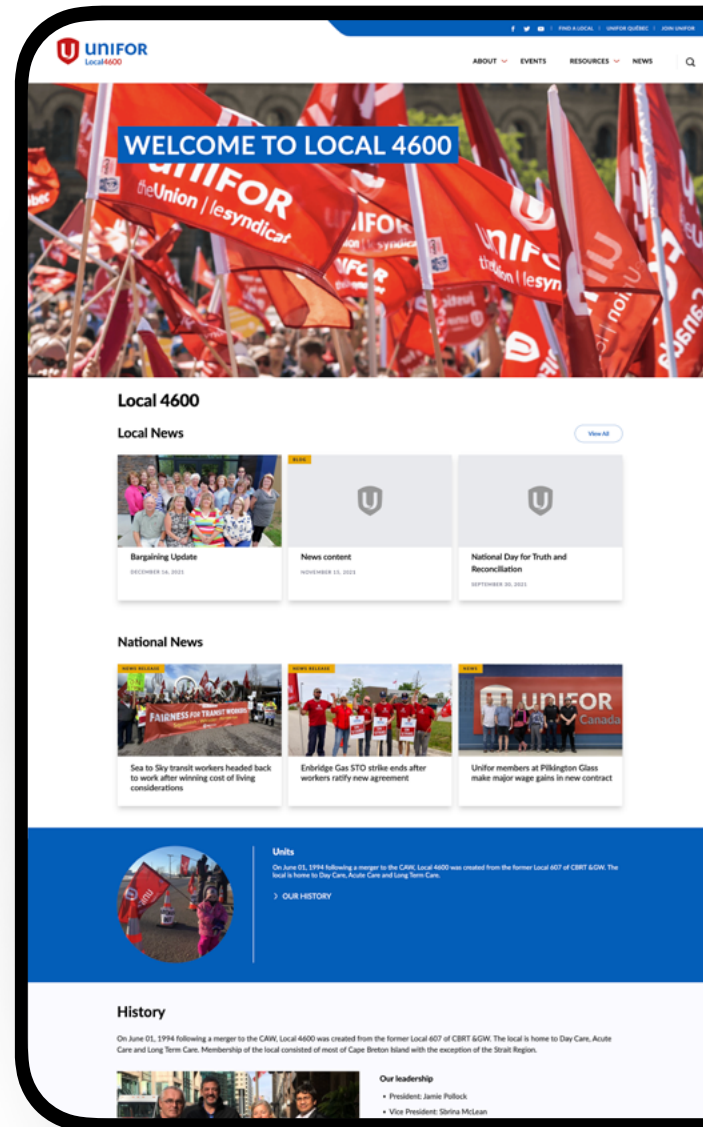

The team is now extending the opportunity to Unifor Locals to leverage the work being completed on the National site, and provide and support branded, flexible, visually powerful, and easy-to-use websites.

Joining up and adopting a new website will extend the following benefits to your local teams, membership, and communities:

- ▶ Branded website within the overall Unifor infrastructure - integration with your Local logo.
- ▶ Media and alerts integration with the National site.
- ▶ Optimized editing experience for easy-to-modify content blocks.
- ▶ Homepage, news (Local and National), events, alerts, header/footers, navigation menu.
- ▶ Social media integration.
- ▶ Contributor, Editor & Administrator user roles/permissions to effectively manage content.
- ▶ Multilingual capabilities, if applicable.
- ▶ Site search integration.

Live Local Sites

Northern has designed a light-weight solution that is deployed quickly, branded proudly Unifor, and launched on National hosting, offering a low-cost, maintained and reliable website package. Check out [Unifor Local 410](#) and [Unifor Local 598](#) who have launched their new sites with Northern Commerce and Unifor National.

Registration
