

The Ford Government has moved a bill that, if passed, will repeal the most worker-friendly labour law reforms that have been adopted in Ontario in a generation.

Bill 47 shows us that every PC MPP is choosing to support businesses instead of the working people of this province.

## Some of the attacks in the Bill include:

- Repealing equal pay for equal work
- No more fair scheduling
- Removing all paid Personal Emergency Leave (and sick leave) davs
  - IANDS **RIGHTS**

- Repealing public holiday pay that increases fairness for part-time
- workers • Taking over and dissolving the Ontario College of Trades
- Lowering fines for employers that break the law

The Ford government is attacking workers on three main fronts through this Bill:

- By freezing the minimum wage at \$14 and eliminating key employment standards, conservatives are rewarding businesses by endangering and taking from the pockets of workers. Millions of workers rely on these basic standards to make ends meet. We deserve respect.
- By making it harder to join a union or keep the union of your choice, the Ford government is telling current workers, as well as the next generation, that they should settle for less fairness at work.
- By taking over and closing the independent Ontario College of Trades and degrading apprenticeship training, the Ford government is taking power away from the united workers' body, threatening the future of high quality apprenticeship training, and possibly endangering skilled trades workers.

## **BUT WE CAN STOP THEM.**

The majority of Ontarians support \$15 and fairness for all workers, but the PCs are still moving forward with this attack on workers.
